Welcome to North Atlantic Regional High School.

NARHS exists because of our strong commitment to the community of home schoolers. If we can provide support, advice based on experience, and time-saving techniques that keep your home-based instruction functioning smoothly, we have done our job. We hope to supply you with a sense of identity, especially through our newsletters that feature current NARHS students. Recently produced manuals and documents such as the Resource Advisor, Log Book, website and now our updated, condensed manual will complement your home learning with current information. Beyond these NARHS ingredients, our staff enjoys tremendously contributing to your success. We are working together to make possible the best education experience your child could possibly enjoy.

April Thome
NARHS Director

Today's educational choices abound and we believe we can help you combine those resources to develop a successful comprehensive transcript that will lead to graduation propelling you into the future of your dreams. Our team can advise a custom education for your student that is personal, flexible, and suited to your lifestyle. In keeping with this mission, we strive to equip the students (and their parents) with the skills and resources necessary for non-stop, lifelong learning.

The mission of NARHS is to strengthen home-based education by providing consultation and tools to support course planning, student work assessment, quality academic learning, and goal setting leading to a high school transcript and eiploma which have far-reaching transferability and acceptance.

Education is our focus. We work with parents, teachers, schools, counselors, military recruiters, college admissions officers, scholarship administrators, and others. Our academic advisors are certified teachers, many with years of experience in education and home schooling.

We welcome you to explore our website and this handbook. In addition, our office leaders are available to answer questions and guide you through the registration process. Please call 1.800.882.2828 from 9:00-3:00 Pacific Time.

Founded and incorporated in 1989, North Atlantic Regional High School is located in Auburn, Maine. NARHS is a state-authorized private school, recognized by the Department of Education. www.Maine.gov/DOE/ Click on "Directory of Maine Schools," scroll down to "Private School Systems," click on "Private Schools Recognized as Providing Equivalent Instruction," scroll down to "North Atlantic Regional High School." We adhere to the foundational core curriculum outlined by the state, but we assist students in planning and delivering a custom-designed program, whether he or she is attending public school, private school, taking college classes, or being home schooled. We diligently work with our families to achieve the required credits to graduate.

Our students come from a mix of home school, public school, and private school arenas. Many NARHS families have unusually high interest in the care, development, and education of their children. Some students are just beginning their high school career and some are coming back to school to earn their diploma, while some students are already attending college. With such diversity, we work hard to create a solid academic program for each. Our role is to help advise, encourage, evaluate, and coordinate learning plans that meet the state requirements while parents are making curriculum, teaching, and content choices. We want to be a valuable resource to our families.

Courses and credits are reviewed by our academic advisors (certified teachers) and once the student has acquired the necessary credits, he or she is eligible for a high school diploma. Students graduate from NARHS with varying numbers of high school credits according to the student's ability, ambition, and academic goals.

Not surprisingly, our graduates have continued down a variety of paths. Some graduates have joined the work force or military, and some have gone on to earn a college or technical degree. The list of graduates at top schools like Harvard, Johns Hopkins University, and Juilliard continues to grow. Our program has helped with unique situations such as missionary students, students with acting careers, professional sports and Olympic figures, as well as professional musicians. It exciting to be a part of students' lives and invest in their future.

In recent years, we have been gratified that public schools and other private schools in numerous states have referred students to NARHS.

#### Registration:

- 1. Each year, download Registration Form, Curriculum Design Worksheet (CDW), and Integrity of Study (IOS) from www.NARHS.com
- 2. CDW: Submit to advisor prior to beginning work.
- 3. Mail signed Registration Form, CDW, IOS, and payment to: 14 South 6th Ave., Yakima, WA 98902.
- 4. Call 1.800.882.2828 for Credit Card Payments.

#### School Year: September 1st - August 31st

The official school year begins September 1st and ends August 31st. School work completed during these months can be considered for high school credit, including school work completed during the summer months. In this case, be sure to continue logging hours in your yearly log book and yearly portfolio.

## **High School Student by Definition**

A student who will turn 14 during the school year (after September 1st and before August 31st).

A student under the age of 14 who has earned high school or college credit in English, Math, Science, or Social Studies from an educational institution. Proof is required.

A student under the age of 14 earning three credits in English, Math, Science, or Social Studies from high school level textbooks.

A student 14 years or older.

## The Process:

Register with NARHS. Choose high school level texts, program, and projects. Submit Curriculum Design Worksheet (CDW) to assigned (certified teacher) advisor. Work at student's own pace between **September 1st and August 31st.** Student completes course work, parent grades course work, and student corrects course work. In addition, parent is documenting/recording all completed work and student is logging hours when required.

During the suggested months of **May through August**, or before, submit home school transcript and completed coursework in a yearly portfolio (must be received by October 31st to avoid \$25 late fee per month). Portfolio is reviewed, credits are allocated according to amount of courses successfully completed, documented, and proven with evidence, and the portfolio is then returned.

Based on reviewed credits, a yearly NARHS transcript is prepared documenting met requirements and an unofficial NARHS transcript is mailed to the family.

#### **Important Dates:**

Early Registration: March -May (Tuition/registration \$445)

June-August (Tuition/Registration \$495)

Sept and beyond (\$545) School Year: 9/1 to 8/31

Portfolio Submissions Suggestion: May - August or before

Late Portfolio Fee: Must receive portfolio by October 31 to avoid late fee.

# What is Home Schooling?

Home schooling is parent directed education. Parents and students decide the direction of the student's learning plan. This learning plan may be based on the student's abilities, interests, and learning style. In addition, it is up to the parent and student to determine the best path for the student's future providing what the parents feel is in the best interest of the student.

Home schooling does not necessarily mean a transfer of information from the parent to the student. It is customizing the student's education. It may include providing advanced courses or labs at the local public high school or courses at the college. Perhaps it includes online courses, co-op courses, or skill center courses.

Home education is legal in every state, but each state has its own regulations. It is vital that you follow your state's requirements in order to participate with NARHS. Some states work with homeschooled students and encourage participation in public or private school activities.

•

# Benefits of Home Schooling

Benefits of Home Schooling:

TIME: Student develops a timeline and schedule that works. This renders a sense of freedom and perhaps even motivates the student to achieve more.

FREEDOM: When the student uses the morning to work in the books then she might be interested in researching hovercrafts, drawing, practicing her violin, running, attending a workshop, seeing a play, or taking a hike in the afternoon.

EXPERIENCE: The student is able to experience a variety of opportunities and explore his interests and talents more throughly.

UNLIMITED: Earn high school credit doing the things enjoyed!

INTERESTS: Concentrate in the areas that captivate the student.

•

# Books & Curriculum

Books & Curriculum: Self-motivated students have a variety of materials to choose from: textbook courses, and self-designed courses, Internet courses, video courses, correspondence school courses, and more. Curriculum can be designed around the strengths (and weaknesses) of the student.

•

# Compulsory School Attendance Law

Compulsory School Attendance Law: A law enacted by each state that requires students to be in an authorized educational program when they reach a certain age. When a student reaches the ending age of the Compulsory School Attendance law, he or she may leave any educational program without seeking any special permission and without parental consent. Once a student has earned his high school diploma, he is no longer subject to the compulsory attendance law.

From the beginning age to the ending age, the Compulsory School Attendance Law can be fulfilled by 1 of the 4 common provisions: enrollment in a public school, enrollment in a private school, enrollment in a home school program, or "other." "Other" may be provisions authorized by a person with authority to provide exceptions under the law. These may have different titles and include Superintendent of Schools, Chancellor of Public Education, Commissioner of Education, or similar.

Exemptions may include injured, ill, or medically recovering children. Unless otherwise provided for by a private school or a home school, these medically limited children are usually given off school grounds tutoring by a public school employee or publicly paid contractor in a program termed "home-bound instruction."

#### Colorado Plan

•

Colorado Plan: The process of completing one academic subject at a time. This plan can work especially well when students are easily distracted or frequently preoccupied with non-academic interest. It can be easier to focus on one academic subject at a time where the all vocabulary is related to that subject. It can be easier to master a course when all the academic information is concentrated around one area of study. With one area of study, there is minimal conflict with other course deadlines for project due dates, mid-term testing, final exams, paper due dates, etc. One subject area controls your academic attention for textbooks, related vocabulary, projects, papers, testing, and so on. While engaged in one academic subject at a time, the student can work daily on music,

# 7th and/or 8th Grade Credits

7th and/or 8th Grade Credits: If a student has earned home school high school credit during their 7th and/or 8th grade year, one course credit can be included on the student's transcript at no cost. More than one credit can be counted for the 7th and 8th grade years, but at Review and Recovery cost. Courses must be high school level textbook courses and evidence is required. If an institution has awarded the credits, then credits will be accepted at no cost. A 7th grader or 8th grader can earn high school credits and remain in the respective grade.

•

# **Activity Credits**

Activities: In addition to coursework, NARHS is experienced in evaluating potential courses and credits from other sources. Be diligent in your record keeping and evidence and be certain to follow the Self-designed Course outline. Consult with your advisor for possibilities.

•

# College Credits

College Credits: A common academic provision is earning high school credits from a college course. An Official Transcript (See Transcript) is required. The college credit will be converted to a high school credit. See below.

•

# College Credit Conversion

College Credit Conversion: College credits will be converted to high school credits. A typical high school course takes 39 weeks to complete and earns 1-credit, however a college course may only take 15 weeks and may earn 3 credits, depending on the college's system. Therefore, when the college course is converted to a high school course it earns 1-credit.

Each college has its own credit system. For example, to earn a Bachelor's Degree from the University of Maine, it takes 120 college credits. Each 3-credit college course will earn 1 high school credit. To earn a Bachelor's Degree from the University of Washington, it takes 180 credits. Each 5-credit college course will earn 1 high school credit. These conversions are the most common.

•

# College Freshman

College Freshman: According to Maine law, a freshman student who has earned the equivalent of one full year of college credits may be awarded a high school diploma. The vital requirements are an Official Transcript from the college verifying the student's earned credits and Associate's or Bachelor's degree college requirements. With this information, your advisor will determine the number of credits required to earn a high school diploma. The number of credits needed may vary.

•

# Credit Allocation

Credit Allocation: You work at your own pace earning the corresponding amount of credit. For example, if you complete 100 pages in a 400-page text, NARHS awards 1/4 credit (0.25) in that subject. Complete 300 pages and NARHS awards 3/4 (0.75) credit and so on. (The smallest allowable credit is 1/4 credit, also written 0.25.) Schedule your own workload and earn full or partial credit. Of course, each credit amount still requires successful completion, documentation, and evidence.

•

# Credit by Definition

Credit by Definition: A unit of achievement to denote the completion of a course or partial course taken at a high school. Different jurisdictions (states, districts, regions) may have different quantitative numbers associated with a "credit." There is no uniform, nationwide standard to define a high school credit. There is no student age limit, nor a limit to the number of credits a student can earn.

•

#### **Dual Enrollment**

Dual Enrollment: The student takes college courses, earning both college credit and high school credit. Include the Official Transcript from the college in your yearly portfolio or mail it to your NARHS advisor.

•

## **Foreign Credits**

Foreign Credits: NARHS is equipped to accept transcripts written in English. Often, American schools overseas (Department of Defense School, a Mission School, an English speaking country, or other US related school) list the years attended, courses taken, grades earned, credits awarded in English. If the student attended a national school in another country, the transcript is usually in that country's language and NARHS will recommend the following commercial records and document translators:

Academic Credential Evaluation Institute: www.acei1.com Educational Perspectives: www.educational-perspectives.org World Education Services: www.wes.org

•

#### **GED**

GED: In order to pass the GED® test, an examinee must have a combined passing score of 2250; in addition, each individual subject area test score must be 410 or greater. New assessment coming: GED2014® Test at www.gedtestingservice.com

If a student does not pass the test, but passes a category (410 or higher) the GED passing score can be converted into high school credit as follows:

Language Arts, Reading (1 credit)
Language Arts, Writing (1 credit)
Mathematics (1 credit)
Science (1 credit)
Social Studies (1 credit) (does not qualify as US History credit)

•

#### Graduation

Graduation: The high school student may graduate once all required (17.5) high school credits are completed. The student can choose his/her graduation date. Graduation date must be after NARHS registration date and after completion of all courses.

•

# Other Schools

Other Schools: Students who have taken courses in a traditional high school classroom may have already earned credit which NARHS may apply towards graduation requirements. Please request an Official Transcript to be sent to the NARHS office or mailed. See below for more details on requesting transcripts from other sources.

•

#### Other Sources

Other Sources: Scouts, sports camps, space camps, Red Cross Certifications, Water Safety Instructor, First Responder Certification, YMCA/YWCA courses, 4-H, church or synagogue courses, Youth Group, mission work, foreign travel, service corps, community activities, community service, public theater, community choirs and choruses, local bands, lessons in music, art, drama, horseback riding, junior Civil Air Patrol, Service Brigade, flight lessons, marksmanship, SCUBA, firearms safety, horsemanship competition, athletics or sports teams, correspondence courses, employer / employee's documented training, and more may earn high school credit.

•

#### Privacy

Privacy or FERPA: Because our field includes the education of minor-aged children, we must protect their confidentiality. NARHS is subject to the provisions under the Family Education Rights and Privacy Act (FERPA). Information about specific students cannot be released to any person or agency without being authorized by the parent, legal guardian, or the adult student.

•

# Proficiency Credits

Proficiency Credits: College-Level Examination Program (CLEP) allows you to earn high school credit by taking exams that test mastery of college-level material. Passing a CLEP test earns 1 high school credit. Mail your passing test results (the only document necessary) to NARHS or your advisor. Study guides are available and there are many areas of interest: www.collegeboard.com/clep for more information.

•

# Regionally Accredited Transcript

NARHS is a candidate for Regional Accreditation with the MSA-CESS. See their website and search for us under "search our schools."

•

# Residency

Residency: Receiving a Maine High School Diploma will not affect your residency. Credit requirements are based on Maine and NARHS requirements. You may use your own state's requirements as a guideline while fulfilling NARHS graduation requirements. As a resident of your own state you do not lose your eligibility to qualify for state aid, scholarships, in-state tuition rates, etc.

•

# Review and Recovery

Review and Recovery: Past home school years can be reviewed by an advisor and converted to high school credit. Complete evidence is required. Past high school or college credits can be reviewed and converted to high school credit, as well. Official Transcripts are required. Yearly registration rate applies to each recovered year and the student must be registered with NARHS.

•

# Summer Activities

Summer activities such as Camp Counselor, swimming instructor, water safety, religious retreats, educational vacations, and other activities might count for high school credit.

•

# Summer School

Summer School: Courses completed by August 31st of the current school year can be presented in the yearly portfolio for credit.

•

## **Team Sports**

Team Sports: Providing the team photo, practice and game schedules, logged hours, and a letter from the coach may earn high school physical education credit.

•

# **Transcripts**

Transcript by Definition: An official record of a student's work showing courses taken and grades achieved.

Official Transcripts contain the official seal and an official's signature representing an institution. At a parent's requests, Official Transcripts are sent from one institution directly to the requesting institution in a sealed envelope. This process supports the validity of the document. Request an Official Transcript to be mailed directly to NARHS, attention: your advisor.

Unofficial Transcripts are usually given directly to the student for information. They are useful for planning the student's school year based on credits already achieved. By the student's senior year, all Unofficial Transcripts will need to be replaced by Official Transcripts. All credits will be verified before the senior transcript and diploma will be issued.

•

# Transcript Evaluations

Transcript Evaluations: Our academic advisors review past Official Transcripts to determine which NARHS graduation requirements have been met and which requirements the student would need in order to graduate from NARHS. For unregistered students, a 25.00 fee is charged. If student enrolls with NARHS, this fee is applied towards tuition.

#### Class Rank

Class Rank: Traditional public schools assign a class rank to students. NARHS does not, due to the uniqueness of our program.

•

## Co-op Courses

Co-op Courses: Co-op indicates that someone has been appointed to conduct a class and/or to assist home schoolers in a subject area. These courses are considered self-designed and will require self-design evidence for credit. NARHS does not consider co-op courses as equivalent to credits issued by a high school.

•

# Final Grade

Final Grade: All home school courses must be dated, corrected, and have a final grade. It is preferable to have numeric grades such as 97, 87, 74, .etc. Our *High School Resource Advisor*, available on the NARHS website, has many, many helpful tools in grading a student's work.

•

# Grading Scale

Grading Scale: NARHS converts all grades to the widely-accepted 4-point, unweighted grading scale. This information is published on each NARHS transcript. Most colleges and scholarship committees will convert an incoming GPA into their own grading scale.

93 - 100		Α	4.00
90 - 92		A-	3.67
87 - 89		B+	3.33
83 - 86		В	3.00
80 - 82		B-	2.67
77 - 79		C+	2.33
73 - 76		С	2.00
70 - 72		C-	1.67*
67 - 69	D+	1.33	
63 - 66	D	1.00	
60 - 62	D-	0.67	

# 100% Grades

100%: If another academic institution issues a grade of 100 then NARHS will enter the course as 100. If home schooled text work, tests, and quizzes receives 100% then NARHS will enter 100, but prefers 97. Keep in mind that perfect scores on a transcript raises red flags for colleges. A score of 97 is still an A and does not reduce the student's GPA.

•

#### **Honors Courses**

Honors Courses: A course can be awarded as "Honors" under the following conditions:

A. If the course has been awarded "Honors" by another school and appears on the school's Official Transcript

B. If the course is identified by the publisher as an "Honors" course and student has presented evidence that documents following the publisher's design exactly

C. If the course was successfully completed from a college textbook and student has presented the publisher designed tests as evidence

D. If the student passes a CLEP, DANTES, or AP test in that subject, then the proficiency preparation course may be awarded as "Honors."

# Passing (P) Grades

Passing Grades: On occasion, a course may be awarded a passing grade (P). It does not carry point-value toward the student's GPA, but it does earn credit-value toward the diploma requirements.

For example, Driver's Education can earn credit toward graduation requirements, however, it is our policy to give the standard .5 credit and a Passing grade when documented with the student's driver's license.

# **Textbook Courses**

Be sure your CDW has been submitted to your advisor and approved prior to each school year. For Portfolio Review, include all evidence that substantiates the course grade. For example, if the final grade is the average on all tests, then only the tests are required. If the grade's average is based on tests, quizzes, daily work, and projects, include all of these.

See below for evidence supporting completion of Textbook Courses:

#### "All Test" Evidence

- (a) The publisher identifies this textbook or course as a high school-level (or higher).
- (b) The student has completed the textbook.
- (c) The parent is satisfied with the work.
- (d) NARHS academic advisor is satisfied with the documentation: Present dated, corrected, graded, end-of-chapter tests, if offered.

#### "All Daily Work" Evidence

- (a) The publisher identifies this textbook or course as a high school-level (or higher).
- (b) The student has completed the textbook,
- (c) The parent is satisfied with the work.
- (d) NARHS academic advisor is satisfied with the documentation: Present dated, corrected, graded, daily work.

For Year End Portfolio Documentation: Complete, Compelling, and Convincing Evidence of Textbook Completion.

# Self-Designed Courses

Be sure your CDW has been submitted to your advisor and approved prior to each school year. Self-designed (SD) courses are courses that do not lend themselves to textbooks, such as physical education, fine arts, music, etc.

Upon registration each school year, a CDW is required. This form requires a SD Course Description for each SD course. Develop a course description containing the following information: course title, learning objectives, activities, resources and materials, and method of evaluation.

Collect evidence during the coursework in addition to logging hours. 80 hours earns 1 credit and 40 hours earns .5 credits. Typically, one course earns 1 credit. If a course exceeds 80 hours, the course may or may not be divided into additional courses according to your advisor. NARHS publishes a sturdy, spiral bound *Daily Logbook* available in a variety of colors. See below for evidence supporting completion of SD Courses:

- \_ A CDW with Course Description has been submitted to NARHS advisor prior to beginning work.
- \_\_ Parent is satisfied that student has met course objectives.
- \_\_ Student has completed 80 hours in one self-designed subject area.
- \_\_ Several Grading Tools (available in our Resource Advisor) throughout course and/or graded work.
- \_\_ NARHS academic advisor is satisfied with documentation: See Portfolio Review for suggestions.

For Year End Portfolio Documentation: Complete, Compelling, and Convincing Evidence of Self-Designed Work.

See the following pages for course description examples.

■ NARHS requires 17.5 credits to graduate.

Language Arts	4
Mathematics	2
Social Studies	1
US History	1
Science (include 1 lab)	2
Fine Arts	1
Computer Skills	.5
Physical Education	1
Health & Fitness	.5
Electives	4.5
Total	17.5

Core Curricular Subjects: Math, Language Arts, Social Studies, and Science

# Computer Literacy: 1/2 required credit

To meet the diploma requirement of 1/2 credit for Computer Literacy, the student must complete a half-year of study or 40 nours of documented instruction. This excerpt is from the Maine Department of Education literature: "The State of Maine requirement - Each student shall be required to demonstrate proficiency in the use of computers. Proficiency shall mean experiences with computers that include loading, operating, and applying fundamental skills. This may include word processing, keyboarding, developing a database, accessing data, and using software. This requirement may be satisfied in grades 7 through 12."

This course is usually considered a self-designed course. It is intended to give the student a comfort level and familiarity with the workings of a personal computer. While this is common today, it was not common when the regulations were written. Therefore, we believe this should be quite easy for high schoolers to demonstrate.

This requirement may also be met through demonstration of their work, or from extensive personal experience, or from employment experience. Students taking online courses and CD-ROM based courses, may use their computer time to complete this requirement. When in doubt about what may qualify, call NARHS for direction.

Because Computer Literary is almost always considered a self-designed course, we offer some additional outline suggestions below. When done as a self-designed course, NARHS expects you to provide a course description with the course documentation in your annual portfolio.

#### Objectives might include:

- · Become familiar with computer use.
- Be able to start up the system and access the program of your choice.
- Be able to create and name a document.
- Be able to enter data and retrieve that data.
- Be able to properly save information, close a document, close a program, and exit the system.
- Be proficient with a word processing program so that documents can be inputted, corrected, deleted, saved, spell-checked, and centered. Text can be underlined, fonts changed, and graphics added by cut, copy, and paste commands.
- · Be able to print documents on a printer.
- Be able to find information stored within the computer.
- Be able to transfer information from one computer to another.
- Be able to load a new program into the computer. (Ability to access the Internet is not required, but does show computer competency.)

Our published book, The First Great Book of High School Course Descriptions, will also give you the specifics about the numerous courses used to meet these objectives. And it will provide the "method," the "activities" and the "evaluation" necessary to write a good course description for the course you choose.

# Course titles for Computer Literacy might include:

CAD (Computer Aided Drafting)
Computer Applications and
Information Systems
Computer Business Applications
Computers, certification in \_\_\_\_\_
(specific program)
Computer Graphics
Computer Processing
Computer Programming
Computer Service and Repair
Computers in Agriculture
Desktop Publishing

HTML
Information Technologies
Keyboarding / Typing
Microsoft Word
PageMaker
PC for Dummies
Photography on the Computer
Video Production
Web Design for Dummies
Web Page Design
Word Processing

# ☐ Electives: 4 1/2 required credits

To meet the diploma requirement of 4 1/2 credits in Elective coursework, the student must complete any combination of four-and-a-half textbook courses or self-designed courses.

Electives can be self-designed courses or textbook-driven courses -- your choice.

- Electives provide the opportunity for students to take the courses that interest them the most.
- Electives allow students to improve the appearance of transcripts by accumulating credits related to their chosen profession.
- Electives allow students to take risks in areas not related to their required courses, providing opportunities to experience new areas of study.

Any subject for which the student has a passion can be used as an elective. For example, if the student is involved in sports, he or she might continue to work on PE credits, even though he or she has completed the required one credit. Assuming the student continues to document the work and earns the additional credits -- say two more -- those two "extra" PE credits can be used to help satisfy the electives requirements.

As self-designed courses, electives are fairly easy to document. You need 80 documented hours of almost any activity for which you can make a course description. Some church activities, some volunteer service, some job training, some household activities might be counted, and more. This should not be difficult, since you may mix-and-match activities, and combine them towards 20 hours for a 1/4 credit, 40 hours for 1/2 credit, and so on.

The same holds true for textbook-driven courses, as well. Some students have a passion for certain academic subjects. Let's use the four traditional science subjects as an example. After the student earns the Earth Science and Biology credits, the minimum graduation requirements have been satisfied (two Science credits). If the student adds the next two sciences -- Chemistry and Physics -- the two additional science courses would be counted towards the electives required.

- There is an extensive list of course titles elsewhere in the Handbook.
- This requirement may also be met through proficiency testing, such as CLEP's, or from extensive personal or employment experience.
- · Consult with your advisor.

# Fine Arts: (FA) 1 required credit

To meet the diploma requirement of 1 credit in Fine Arts, the student must complete one year's worth of study -- 80 hours of documented study. Fine Arts includes anything related to music, the visual arts, or the performing arts. The Fine Arts credit may be earned by documenting combinations of these art forms, and it does not require that all 80 hours be in one art discipline.

This excerpt is from the Maine Department of Education literature: "The State of Maine requirement- A year of Fine Arts instruction shall be required which may include arts, music, forensics, or drama. Fine Arts may be provided through separate or integrated study and may include awareness, appreciation, or performance of the art form."

- · NARHS will accept completion of one foreign language credit as an equivalent exchange to fulfill this requirement.
- See the list below for titles which may count...some you might not expect.
- The course symbol for Fine Arts is FA.
- This requirement may also be met from extensive personal or employment experience.
- · Consult with your advisor.

Fine Arts is almost always considered a self-designed course, except when using a bona fide textbook. We offer some additional outline suggestions below. When done as a self-designed course, NARHS requires you to provide a course description along with the course documentation in your annual portfolio.

Fine Arts can be one of the subjects more difficult to prove. "Proving" you did an activity in Fine Arts means producing some physical evidence that you participated in or studied the activity. For example, if you went to a play, show us the receipt or write a paper on the experience. If you took guitar lessons, produce video segments showing your practice sessions or lessons, produce a letter from your instructor, or accumulate the payment receipts for the lessons. If you are painting or drawing, show us photographs of the pieces you have done (with YOU in the photos), or show us photographs of you working on the pieces. There are other ways to "prove" what you did. Whatever method you choose, be sure to provide enough evidence ("proof") to be complete, compelling, and convincing. Photos, letters, videos, certificates, awards, receipts, papers, essays, research papers, and the like could be used as part of the "proof" we are looking for in your portfolio review.

## Course titles for Fine Arts might include:

ART areas may include:

Art Appreciation Art History Carpentry

Computer Graphics, CAD Cosmetology

Crafts
Drawing
Furniture Making
Glass Blowing
Graphics
Jewelry
Metal Design

Painting with acrylics, oils, or water-

colors Photography Pottery Sculpturing

Serigraphy-silk screening

Musicals
The Greek Chorus

Shakespearian Form and Style

Shakespearian Theatre

MUSIC areas may include:

Listening to a variety of music genres

Singing in a choir

Singing solo, or in a small group Playing an instrument in a band,

ensemble, or orchestra Interview local musicians

Additional course titles may include:

Music Appreciation Music History Music Theory

History of the Orchestra and Voice

Music for Dance

Music Production & Recording

Music in Television Music for Theatre Music Composition

Strings Percussion Brass Woodwinds Conducting

# Health: (HE) 1/2 required credit

To meet the diploma requirement of 1/2 credit in Health, students must complete a half-year of study or 40 hours. This excerpt is from the Maine Department of Education literature: "The State of Maine requirement - One-half year of health education instruction shall be required. Health education shall include instruction in community health, consumer health, environmental health, family life, growth and development, nutritional health, personal health including mental and emotional health, prevention and control of disease and disorders, safety and accident prevention which, may include cardiopulmonary resuscitation (CPR), and substance use and abuse, including the effects of alcohol, drinks, stimulants, and narcotics upon the human system."

- · Textbooks abound.
- · See the list below for titles which may count.
- The course symbol for Health is HE.
- This requirement may also be met from extensive personal or employment experience.
- · Consult with your advisor.

Health is a course for which there are textbooks. When using a bona fide textbook, be sure that the publisher identifies it as a high school course, and inquire if they consider it to be a one-semester course (worth 1/2 credit) or a full-year course (worth 1 credit). Both are common among textbook publishers. More and more families choose to make the Heath course a selfdesigned course, customizing the content to fit their family needs, beliefs, or customs.

When completed as a self-designed course, NARHS expects you to provide a course description with the course documentation in your annual portfolio.

Please note: (a) Many of the courses listed below are considered self-designed, such as Alternative Medicine, Health Careers, and Personal Fitness for the Physically Disabled. As with all self-designed courses, NARHS has three requirements in order to award credit:

- 1. Course Description submitted with registration form
- 2. Daily Log accounting for each hour invested in the course and the TOTAL number of hours invested in the course
- 3. Evidence the student did the work for this course, along with graded samples showing achievement.

Evidence might include producing research, demonstrations on video, or other creative means; be sure the evidence you prepare is complete, compelling, and convincing. Photos, letters, videos, certificates, awards, receipts, papers, essays, research papers, and the like could be used. Be certain accumulated hours totals 40 in order to reach at least 1/2 credit.

- (b) Some Health courses are taken at other institutions (CNA, PCA, Lamaze Classes, etc). In such cases, be sure to record the hours invested in the course and acquire a copy of the course description from that institution -- this may take the form of a flier or brochure explaining the benefits of the course and what will be covered in the course. When taken from other institutions, they are likely to issue a Certificate of Completion, or can at least issue a letter verifying your participation. This is the kind of evidence we are looking for when the course is taken at other institutions.
- (c) When using a Health textbook, be sure to keep the student's work: papers, tests, quizzes, etc. Then present enough evidence in your portfolio to make the documentation complete, compelling, and convincing.

Our High School Resource Advisor provides multiple "grading tools" that will assist you in assigning a course grade.

# ☐ Language Arts: (LA) 4 required credits

To meet the diploma requirements, a student must complete 4 credits in English/Language Arts. This excerpt is from the Maine Department of Education literature: "The State of Maine requirement - Four years of English instruction shall be required in a comprehensive program which includes reading comprehension, literature, written, listening and oral skills, the structure and uses of English, language, and research and reporting skills."

Language Arts is usually considered a textbook-guided course. Unit studies are possible, some exist in the form of organized studies, others can be self-designed by parents and students. Whether you use textbooks or self-designed courses, NARHS will require evidence of student's work.

- Textbooks abound.
- See the list below for titles which may count...some you might not expect.
- The course symbol for English is LA.
- May also be met through proficiency testing, such as the CLEP.
- Consult with your advisor.

NARHS has outlined a course called "Classics and Composition" in which the student reads 12 classics and writes a two-page paper on each for 1 credit.

# Course titles for English / Language Arts might include:

# ☐ Math: (MA) 2 required credits

To meet the diploma requirements, a student must complete 2 credits in Math. This excerpt is from the Maine Department of Education literature: "The State of Maine requirement - Two years of mathematics instruction shall be required. It is highly recommended that all students have exposure to basic algebraic concepts and skills. Algebra is viewed as a gateway subject that helps students to a better understanding of the technological world in which we live. Algebraic skills are and will continue to be a prerequisite to a diverse and broad range of courses and occupations."

Algebra: Maine high school graduation requirements do not include Algebra. Two math credits are required, and Algebra can be one (or both) of them, but it is not required. However, Algebra might still be a good idea, especially for students who may need this in a career or for college following high school. It is the responsibility of the parents and the student to anticipate what a college might need for a successful applicant.

Math is usually considered a textbook-guided course. Unit studies are possible, some exist in the form of organized studies, others can be self-designed by parents and students. Whether you use textbooks or self-designed courses, NARHS will require evidence of student's work.

- Textbooks abound.
- See the list below for titles which may count...some you might not expect.
- The course symbol for Math is MA.
- May also be met through proficiency testing, such as the CLEP.
- · Consult with your advisor.

# Course titles for MATH might include:

Real Estate Values, Appraisals Residential Architecture

Technical Math

Trigonometry

# Physical Education: (PE) 1 required credit

To meet the diploma requirement of 1 credit of Physical Education the student must document 1 year or 80 hours of instruction in Physical Education or participation in planned physical activity, or a combination of both.

This excerpt is from the Maine Department of Education literature: "The State of Maine requirement - One year of physical education instruction shall be required Physical education shall be designed to promote physical well-being, self-esteem, self-awareness, sportsmanship and interpersonal skills. This requirement may include but is not limited to: physical fitness, fundamental motor skills and patterns, adaptive physical education, individual and group sports. Physical education may include special physical education, movement education, and motor development."

NARHS considers Physical Education to be a self-designed course. There are very few bona fide textbooks available for Phys Ed; but, if you prefer to simply find a textbook and treat it as a textbook course, that is acceptable. If you use a text, be certain to complete the book to earn the full 1 credit required.

Physical Education may involve skiing, biking, running, golfing, walking, hiking, weight lifting, exercising, etc. Individual sports (running, skiing) and/or team sports (baseball, soccer, football, basketball, hockey) qualify. Individual instruction in any sport and the practice time can also qualify for this credit. Document instruction time, practice time and game time toward your total eighty hours. Local recreation departments can provide you with a list of team sports offered in your community. Activities may be available to you through organizations such as a church group, 4-H, fitness centers, YMCA, YWCA, public schools, adult education, sports camps, clubs, gyms, and videos.

# ☐ Science: (NS) 2 required credits

To meet the diploma requirement, the student must earn 2 credits in Science. This excerpt is from the Maine Department of Education literature: "The State of Maine requirement - Two years of science instruction shall be required, including one year of laboratory study."

Science is usually considered a textbook-guided course. Unit studies are possible, some exist in the form of organized studies, others can be self-designed by parents and students. Whether you use textbooks or self-designed courses, NARHS will require evidence of student's work.

Science is generally divided into two categories: things that are alive, and things that are not. Some students thrive on the life sciences, others thrive on the earth or chemical sciences. The choice is the student's.

- · Textbooks abound.
- See the list below for titles which may count...some you might not expect.
- The course symbol for Science is NS.
- May also be met through proficiency testing, such as the CLEP, or from extensive personal or employment experience.
- Consult with your advisor.

A "lab science" is really a science in which you do something with the science. A lab science could be a lab other than dissecting or combining chemicals in a test tube:

Culinary Science (cooking would be the lab),

Horticulture (gardening and agriculture would be the lab),

Equestrian Science (horse health, care, and training would be the lab),

Computer Science (assembling, repairing, and programming would be the lab),

Mechanical Science (engine design, diagnosis, and repair would be the lab)

Fabric, Textile, and Design (sewing becomes the lab) ...and so on.

To be labeled a "lab science," the student must complete at least 12 "laboratory activities" while studying that area of science. For example, a course such as Biology will appear on the transcript as follows:

Biology w/Lab .....1 credit

When a student completes at least 20 labs, then NARHS will award 1-1/2 credits for that course. For example, if a student studies Biology and does a minimum of 20 labs, the work will appear on the transcript as follows:

Biology ......1 credit Biology Lab ......1/2 credit

# ☐ State Studies: (ST) optional

State Studies is no longer a required course for graduation from NARHS or other Maine high schools. However, many students coming to NARHS have already taken this course in their own state. It still counts as high school credit. This course involves studying one or more aspects of an individual state -- any state. This may be done using textbooks, but there are few published for this subject. If you would like to do a State Studies course, we suggest you speak to your NARHS advisor. NOTE: This course is given special treatment in the Department of Education regulations -- when taken in 6th grade, 7th grade, or 8th grade, it is, also, eligible for, and earns, high school credit.

Following are two State Studies course examples. They are designed to systematically probe any state and develop the student's understanding of that state.

#### State Studies. 1

This course studies the local and regional aspects of the state selected. It may also cover its significance upon entry into the United States, its contribution to the union and the region, as well as its unique characteristics.

#### Objectives of State Studies, 1

- To become familiar with the operations of your state government
- To become familiar with the major historical events
- · To become familiar with the geography, topography, climate, cities, counties, and rivers
- To become familiar with animals, plants, and wildlife
- · To become familiar with industry and products, such as agricultural industries, as well as factories, and mills
- To become familiar with famous people in your state: explorers, statesmen, stateswomen, notable authors, artists, and musicians and their works
- · To become familiar with cultural and ethnic heritage

#### State Studies, 2

This course is designed to familiarize students with their own state history by focusing on geography, economy, governmental structures, significant individuals, wildlife, and recreational locations. Through this research-based study, students will look at the various economic, social, and political influences that have shaped the region into the unique area of the present. Various local individuals from the past and their contributions to the community and the state will be studied as well as how the geography of the region influenced its story. Students will be expected to research, write, and create a notebook that increases understanding of and connection to their regional history.

#### Objectives of State Studies, 2

- To collect both detailed and factual information regarding the state
- To explain the settling patterns of the state
- To compare the contributions of different nations that settled in the state
- To know how the natural resources have influenced the development of industries
- To examine the components of state, county, & city governments
- To be familiar with the state political and geographic map, county maps, and city boundaries
- · To stay current on city, county, and state news

# United States History: (US) 1 required credit

To meet the diploma requirements, a student must complete 1 credit in US History. This excerpt is from the Maine Department of Education literature: "The State of Maine requirement - One year of American history and government shall be required in a comprehensive course which includes instruction in the importance of voting, the privileges and responsibilities of citizenship, the Constitution of the United States and the Declaration of Independence."

US History is usually considered a textbook-guided course. Unit studies are possible, some exist in the form of organized studies, others can be self-designed by parents and students. Whether you use textbooks or self-designed courses, NARHS will require evidence of student's work.

- Textbooks abound.
- See the list below for titles which may count.
- The course symbol for US History is US.
- May be met through proficiency testing, such as the CLEP.
- Consult with your advisor.

# Course titles for US History might include:

American History
American Civil Law, a history
American Criminal Law, a history
History of the United States through 1877
History of the United States from 1865
Junior ROTC
Our American Heritage
The American Revolution
The Civil War
The Presidency in American History
US History
US Civics
US Government
US Economics

# PORTFOLIO

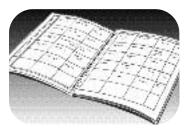

Between the months of May and August, submit a student portfolio to your advisor representing the coursework that has been completed since September 1st. The Portfolio Review is an important process in receiving credit for your courses. The following summaries will help guide you through the portfolio process. In addition, the following pages will give you more detail in each of these areas. Please remember, you are always welcome to contact your advisor or the NARHS office at 1.800.882.2828. 1. Confirm that your Registration, CDW, and IOS have been received. 2. In addition, tuition must be paid in full prior to portfolio review.

3. Return Postage Label or Payment The office wil notify you once your portfolio has been received. In addition, the office will confirm receipt of return postage and notify you if return postage is due. Unfortunately, the return postage must be paid prior to beginning the review process. It is in your best interest to include a label or payment with your portfolio.

5. Summary Sheet
This one-page document offers a few lines about each textbook and self-designed course. It also contains a statement about how each course was accomplished and evaluated. See example.

7. Daily Log Book.
This day-by-day written log contains the daily hours and total yearly hours invested in each self-designed course. This book is vital in corroborating the evidence presented in the portfolio.
See example.

4. Home School Transcript
This one-page document is a snapshot of what was accomplished during this school year. It contains the course, final grade, and credit amount attempted. It is prepared and signed by the parent. See example. Please request Official Transcripts from additional high schools and/or colleges to be sent to NARHS: attention your advisor.

6. Evidence & Graded Work
This collection provides a variety of evidence proving
the completion of each course. Organize the portfolio
by subject and include the requested evidence.
Include enough evidence to provide a thorough picture of the completed work. It must be convincing and
compelling for each course. See *High School Resource Advisor* and your NARHS advisor.

# Evidence: Complete, Compelling, and Convincing

#### **Textbook Documentation**

Student has completed textbook work and logged hours
--

- Parent is satisfied with the work.
- \_\_ NARHS advisor is satisfied with the documentation.

Documentation: Complete, Compelling, and Convincing Evidence of Textbook Completion

"All Test" Evidence (Include tests if final grade is computed using test scores.)

- (a) The publisher identifies this textbook or course as a high school-level (or higher).
- (b) The student has completed the textbook,
- (c) The parent is satisfied with the work.
- (d) NARHS advisor is satisfied with the documentation:

Track the daily completed textbook pages in a logbook.

Present dated, corrected, graded, end-of-chapter tests, if offered.

Testing-out is an option.

"All Daily Work" Evidence (Include daily work if final grade is computed using daily work scores.)

- (a) The publisher identifies this textbook or course as a high school-level (or higher).
- (b) The student has completed the textbook,
- (c) The parent is satisfied with the work.
- (d) NARHS advisor is satisfied with the documentation:

Track the daily completed textbook pages in a logbook.

Present dated, corrected, graded, daily work.

## Self-Designed Documentation

- \_\_ Student has completed and logged 80 hours in one self-designed subject area.
- \_\_ A "Course Description" has been submitted to NARHS.
- Parent is satisfied with the work.
- \_\_ NARHS advisor is satisfied with the documentation: Below is a list of suggestions:

## Suggested Evidence:

- -- Audio tapes
- -- Book reports
- -- Essays
- -- Fishing or hunting licenses
- -- Letter from an employer
- -- Letter from co-workers
- -- Letter from the coach
- -- Letter from the minister or rabbi
- -- Letter from the music teacher
- -- Letter from the youth leader
- -- Letter from volunteer coordinator
- -- Lift tickets from your ski trip
- -- Pay stubs
- -- Certificates of Accomplishment, such as martial arts belts, merit badges, or Eagle Scout work
- -- Certificates of Completion, such as CPR, First Aid, Hunter Safety
- -- Mock newspaper article you wrote about your research or discovery
- -- Photographs of the student in uniform, such as work uniform or sports team
- -- Poems, songs, or proverbs related to the subject
- -- Receipts of your admission to a park, museum, play, concert, etc.
- -- Video of rehearsals or practice, such as a musical instrument, foreign language practice, dance recital, etc.
- -- Video / mock TV commercial you made telling about your research or discoveries

- -- Photographs of projects in progress
- -- Photographs of projects
- -- Prints of computer-generated work
- -- Receipts for your lessons
- -- Receipts for software and hardware
- -- Research papers
- -- Short stories
- -- Video of a project in progress

# Community Service Form

Community service hours are unpaid activities that benefit the community and others. Community service is eligible for high school credit to those who are at least 14 years. Take this form with you each time you volunteer so your hours and minutes can be verified by a supervising adult. Maximum number of hours allowed per day is eight.

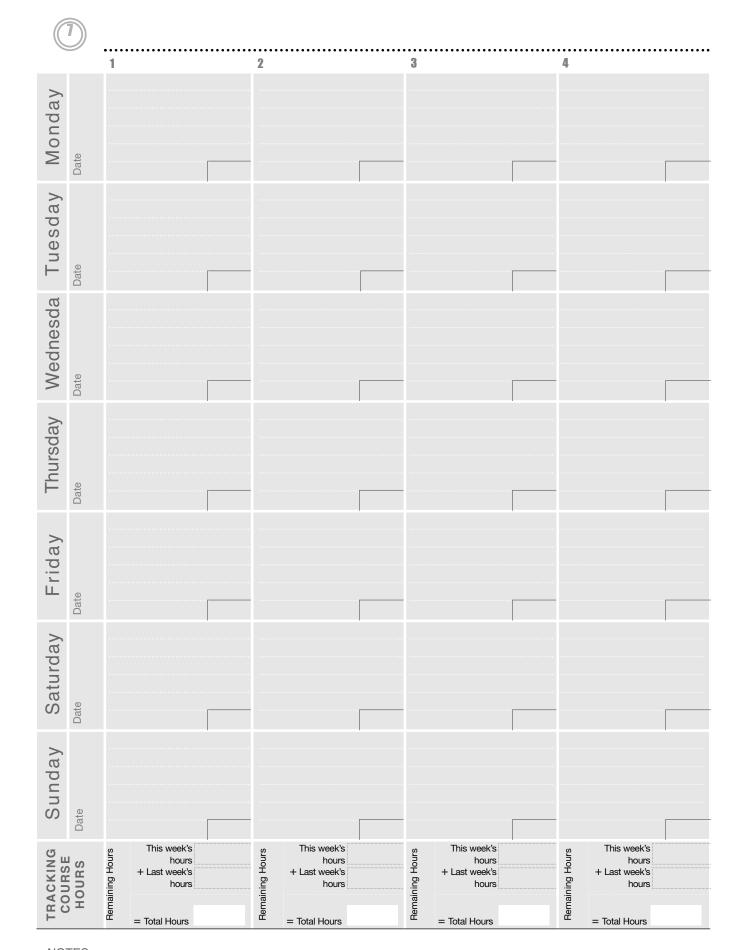

Credit hours can be used towards high school credit OR hours can be listed under transcript community service. It is recommended to track the number of volunteer hours per location. For example: Harvest CC Nursery Volunteer: 36 hours.

The high school transcript is a complex, legal academic record. The transcript is one tool used by employers, military recruiters, security agencies, law enforcement, the judicial system, as well as the usual college admission counselors, scholarship committees, and student loan officers. The school's verification process is vital. In addition, the signatures, school stamp, and embossing seal are intended to represent and authenticate the student's academic record.

## Summary of Transcript Sections:

#### 1. Student Identification

Achievements: This section (optional) can be used to record the student's yearly achievements. Provide a letter, citation, trophy, award, newspaper clipping, certificate, or likewise in the yearly portfolio.

#### 2. Student's Academic History

Source, grade, year, category type, course name, grade, and credit amount are entered here.

#### 3. Summary

Total credits earned, required, still needed, and in addition to the required amount in LA, FL, MA, SS, US, NS, FA, PA, BU, CS, PE, ST, and HE are tallied here.

#### 4. Additional Student Information

Achievements: This section (optional) can be used to record the student's yearly achievements. Provide a letter, citation, trophy, award, newspaper clipping, certificate, or likewise in the yearly portfolio as evidence.

Community Service: This section (optional) is a great opportunity to encourage and record volunteering. It is a good idea to record accumulated hours in each area. For example, if your student has served meals every Friday for the last year at the homeless shelter, you could record this as The Union Gospel Mission, 52 hours and include the supervisor's signature. Community service is required for some scholarship applications and has been added to many public school graduation requirements.

#### 5. Testing:

Special testing (optional), such as Advanced Placement test (AP), College Level Examination Program (CLEP), Excelsior College Examinations, Industry Competency Examination (ICE), International Baccalaureate (IB), DANTES (DSST), and others.

#### 6. ACT/SAT Scores

"The SAT and SAT Subject Tests are a suite of tools designed to assess your academic readiness for college. These exams provide a path to opportunities, financial support and scholarships, in a way that's fair to all students. The SAT and SAT Subject Tests keep pace with what colleges are looking for today, measuring the skills required for success in the 21st century." www.sat.collegeboard.org

"The ACT is taken by high school students and college-bound individuals. The score results are used by colleges for admission, course placement and advising purposes, and by states, districts, schools, teachers, and students for diagnostic, monitoring, and intervention purposes." www.act.org

#### 7. Secondary Schools Attended:

All courses reference the location the course was completed and graded, including home school courses. If grades/credits have been earned from a source other than your home school, the source is identified here.

#### **8. Grading System:** Grade Point Average GPA Scale:

93-100	Α	4.0
90-92	A-	3.67
87-89	B+	3.33
83-86	В	3.0
80-82	B-	2.67
77-79	C+	2.33
73-76	С	2.0
70-72	C-	1.67
67-69	D+	1.33
63-66	D	1.0
60-62	D-	.67
	90-92 87-89 83-86 80-82 77-79 73-76 70-72 67-69 63-66	90-92 A- 87-89 B+ 83-86 B 80-82 B- 77-79 C+ 73-76 C 70-72 C- 67-69 D+ 63-66 D

All classes are given equal weight in calculating GPA.

#### 9. Signature & Validation:

Official Transcripts must be signed by the registrar's office and bear our embossed seal. As an additional safeguard, organizations requesting an Official Transcript prefer a transcript mailed directly from NARHS.

#### 10. Official Transcript:

The mailed envelope will contain a signed, embossed Official Transcript and the envelope itself will have an official"s signature. These steps secure the validity of the transcript.

# Profile of our High School

The North Atlantic Regional High School is a school based in Auburn, Maine. NARHS is a state-authorized private school, recognized by the Department of Education as providing equivalent instruction. We assist in designing and advising a custom-designed program for each student, whether he/she is attending public school, private school, college classes, home-based education or a combination. For home school families, parents decide and direct the content of each course, while fulfilling the requirements for each specific high school credit. Courses taken as home schoolers are reviewed by our certified teachers. Students graduate with varying numbers of credits according to their ability, ambition, or academic goals.

Founded and incorporated in 1989, we adhere to the foundational core curriculum outlined by the state, but allow broad flexibility in fulfilling those requirements under the careful evaluation of our state-certified staff.

Students working on their high school courses are allowed to proceed at their own pace; they can go as fast as they like, or as slow as they need.

# Profile of our Student Body

Students may come to us with a mix of public schooling, private schooling, college work and home-based education. Some students start working on their high school diploma when they are in 7th or 8th grade. Others finish requirements as adults. For some we work with their very first course selections for high school, while for others we work to reconstruct the academic work they did years ago.

NARHS graduates have moved into college, careers, and all branches of the military. Some continued family farms, some went to technical schools, and some became apprentices in trades. The list of colleges accepting NARHS graduates grows larger every year.

Over the years, some students were young professional actors, sports figures or musicians or dancers. These students presented unique issues to manage while they carried out careers and maintained studies simultaneously. We have that flexibility. And we enjoy the diversity these students offer to our student body.

Although all our students were not prepared in the same way, they were all prepared for the same thing --- adulthood.
